<b>Description:</b>	So, I have problems with both the dsp manager and the asop manager in the custom rom installation. It just won't install and it says my free MB's are smaller than the size MB's when it tells me to click install. It installs, I just can't find the dsp manager and if I install the asop mms, my phone crashes.  BTW, please forgive me for posting this on the wrong section. Idk how I put it on the JB Kernel Section.
